

Cookies Policy – Diamo Security Ltd

Website: diamasecurity.com

Version 1.0 | Final draft | 16 October 2026

1. Purpose and scope

This policy explains Diamo Security Ltd's approach to cookies and similar technologies on diamasecurity.com. It covers information stored on, or accessed from, your device, including cookies, local storage, pixels and similar tracking technologies. Please read it alongside our Privacy Policy.

2. What cookies do

Cookies are small files stored by your browser. Session cookies normally expire when a browser session ends; persistent cookies remain for a defined period or until deleted. First-party technologies are provided by the website you visit; third-party technologies are provided by another organisation. The actual names, providers, purposes and lifetimes must be listed in the verified inventory below.

3. Our approach to choices

Diamo adopts a consent-first approach to optional analytics, preference and marketing technologies. Optional technologies must remain disabled until you make an affirmative choice. Simply continuing to browse does not indicate consent. Rejecting optional technologies must not prevent access to the core website information.

Technologies essential to a service you request may operate without consent where a valid legal exception applies. Any other exception must first be assessed, documented and reflected in this notice and the website controls, including any required right to object. Advertising and cross-site tracking require consent.

4. Categories to be verified

Essential: technologies necessary for requested functions, security or recording cookie choices.

Preferences: technologies remembering optional settings.

Analytics: technologies measuring how visitors use the website.

Marketing and embedded services: technologies used for advertising, social media or externally hosted content.

These descriptions explain possible categories; they do not confirm which technologies this website currently uses.

5. Cookie inventory – complete before publication

The website administrator must replace this draft inventory with the verified technologies actually used, including third-party storage and similar technologies. Do not publish unverified entries or leave this section incomplete.

Required information	Verified website details
Name and technology type	To be confirmed by website administrator
Provider and domain	To be confirmed by website administrator
Purpose and category	To be confirmed by website administrator
Duration / expiry	To be confirmed by website administrator
First-party or third-party	To be confirmed by website administrator
Consent requirement / exception	To be confirmed by website administrator
Provider privacy information	To be confirmed by website administrator

6. Managing and withdrawing choices

You can accept, reject or change optional categories through the website's cookie settings control. You can withdraw consent at any time, as easily as giving it. Withdrawal stops future consent-based storage or access, but does not invalidate earlier lawful processing.

You can also delete or block cookies through your browser settings. Blocking essential cookies may prevent requested features working. Deleting stored preferences may mean you are asked to choose again. Browser controls alone are not a substitute for Diama's consent controls.

7. Third parties and personal information

Where third-party services are used, the inventory must identify the provider and link to its relevant privacy information. Optional tracking associated with an embedded service must not load before the required choice.

Where these technologies process personal information, our Privacy Policy explains our processing and your rights. Retention must be limited to the purpose; actual device lifetimes must be stated in the inventory. Any overseas transfers must be assessed and explained in the relevant privacy information.

8. Contact and changes

For questions, contact info@diamasecurity.com. Our Data Protection Lead, Siddiq Mohammed, can be contacted at control@diamasecurity.com. You can also raise data protection concerns with the Information Commissioner's Office at ico.org.uk.

We will review this policy when website technologies or requirements change. New purposes requiring consent will not be enabled under an earlier unrelated choice.
